Quality. Service. Innovation.

Who We Are

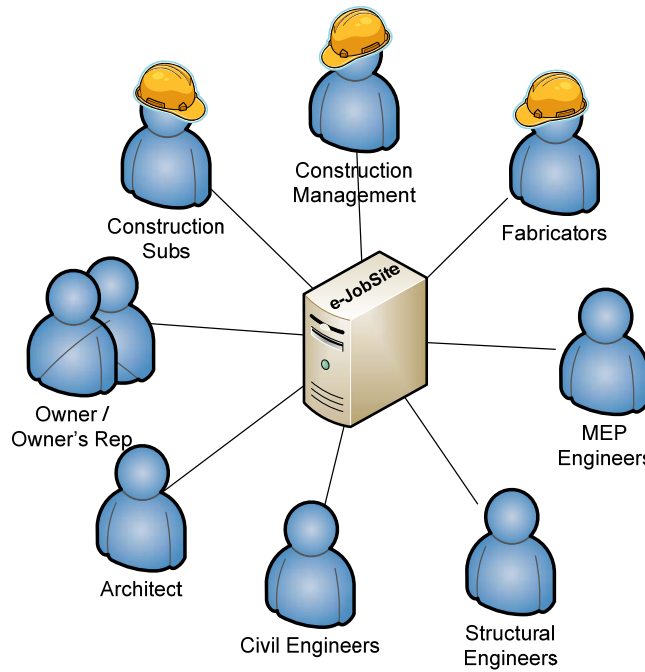

TRC InfoTek is a Technology Consulting and Outsource Services firm, headquartered in the U.S. We are designed to help business and IT executives solve existing challenges and take advantage of new strategic opportunities through the effective use of technology, without the typical hassles, limits, and obstacles.

TRC InfoTek is a subsidiary of TRC Worldwide Engineering, Inc., a full service civil engineering firm. We're using the science and expertise of our 20 year engineering legacy to deliver technology solutions that truly meet your requirements.

e-JobSite™

Our e-JobSite™ service provides a shared website for the entire project team to share project information, news updates, and documents throughout the life of the project. No more do you need to worry about emailing large CAD files. FTP issues disappear. No time delays or costs associated with shipping paper. No questions about using the most current versions of the drawings.

The result? Instantaneous access to accurate information for distributed project teams. Better teamwork. Better results.

Trusted Architecture

e-JobSites™ are built using Microsoft Sharepoint with added site provisioning and security management tools.

Each e-JobSite™ is allowed a 'Site Boss' who manages the team member access rights. Users can maintain their own passwords.

Each e-JobSite™ is independent from other sites and team members must be provided secure access to each e-JobSite that they are member of.

e-JobSites™ are hosted at a hardened data center with full redundancy, security, disaster recovery, and 24/7 monitoring.

e-JobSite™ Information

- Project Overview and Current Status
- Project News & Updates
- Project Participants / Contact List
- Project Progress Photos
- Project Issue Lists
- Project Facts
- Project Documents
 - Guidelines, Standards, Processes
 - Contracts
 - Drawings, Diagrams, Models
 - Parts Lists
 - Schedules

e-JobSite™ Tasks

- Document Upload/Download
- Document Check-in/out
- Document Search
- Document Security
- Document Versioning
- Document Status, Review & Approval

Pricing

e-JobSite™ clients pay an initial setup fee and a monthly usage fee. Fees are based on the estimated number of users and amount of data storage.

The Single Source of Project Truth
