**Consulting.
Development.
Solutions.**

Who We Are

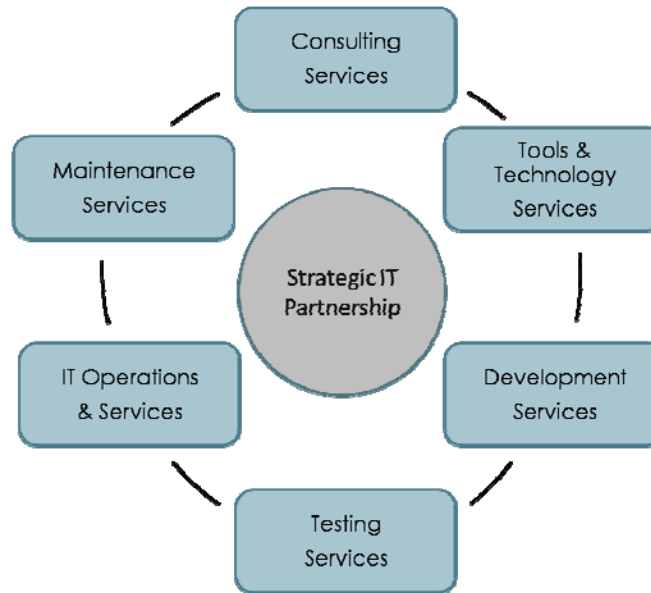

TRC InfoTek is a Technology Consulting and Outsource Services firm, headquartered in the U.S. We are designed to help business and IT executives solve existing challenges and take advantage of new strategic opportunities through the effective use of technology, without the typical hassles, limits, and obstacles.

TRC InfoTek is a subsidiary of TRC Worldwide Engineering, Inc., a full service civil engineering firm. We're using the science and expertise of our 20 year engineering legacy to deliver technology solutions that truly meet your requirements.

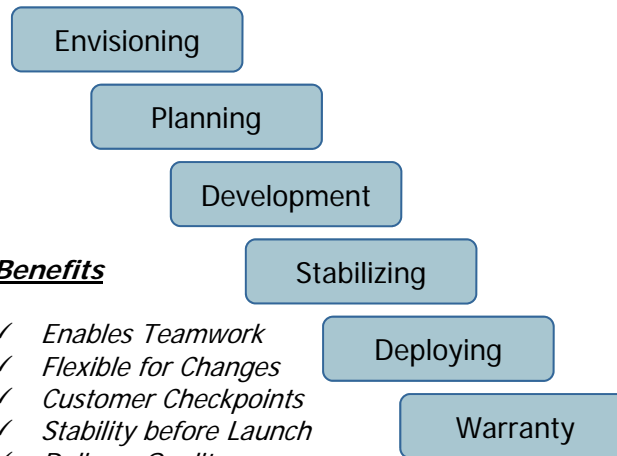

Blended Global Model

Our Blended Global Delivery Model gives you the best of both worlds. Our local consultants work directly with your staff, and are home-based in the U.S. Hassles due to time-zone and cultural differences common in off-shoring are eliminated. Our local consultants are business savvy and know how to design technology solutions that bring business value. Our off-shore team brings additional technical skills to the project team, as well as offering a flexible pool of talent.

Our Services

Our Delivery Process

Benefits

- ✓ *Enables Teamwork*
- ✓ *Flexible for Changes*
- ✓ *Customer Checkpoints*
- ✓ *Stability before Launch*
- ✓ *Delivers Quality*

Consulting Services

Project Management, Requirements Management, IT Metrics, Methodology, Portfolio Management, Disaster Recovery

Tool and Technology Services

Evaluation of vendor tools, followed by customization, implementation or upgrade of those tools. For example, evaluating Sharepoint vs. Lotus Domino Document Repository.

Development Services

Full lifecycle outsourced software development and enhancement services. For example, development of a steel fabrication estimation tool, or extending your web tools for customers or employees on mobile devices.

Testing Services

Test Planning, Test Scenarios, Test Cases, Test Data, Test Environments, Test Execution. For example, independent testing of an staff training/certification tracking tool.

IT Operations Services

24 x 7 Help Desk and IT Environment monitoring and maintenance.

Maintenance Services

24 x 7 application bug fixes

Higher value & hassle-free..... the best of both worlds.
